

### Amendments to the Claims

**1. (Currently amended)** A process for the preparation of (R)-1,2-propanediol, comprising: cultivating a microorganism Pseudomonas nitroreducens DS-S-RP8 (Deposit No.: FERM BP-7793) or Alcaligenes sp. DS-S-7G (Deposit No.: FERM BP-3098) ~~microorganism belonging to the genus Pseudomonas or genus Alcaligenes~~ which assimilates (S)-1,2-propanediol in a complete synthetic medium containing racemic 1,2-propanediol as a single carbon source ~~source, in a culture medium containing racemic 1,2-propanediol as a single carbon source or a complete synthetic medium containing racemic 1,2-propanediol as a single carbon source;~~ wherein the microorganism stereoselectively ~~assimulates~~ assimilates (S)-1,2-propanediol; and then isolating the remaining (R)-1,2-propanediol from the culture broth.

**2. (Cancelled)**

**3. (Original)** The process according to claim 1 wherein the microorganism is Pseudomonas nitroreducens DS-S-RP8 (Deposit No.: FERM BP-7793).

**4. (Cancelled)**

**5. (Original)** Pseudomonas nitroreducens DS-S-RP8 (Deposit No.: FERM BP-7793).

**6. (Cancelled)**

**7. (New)** A process for the preparation of (R)-1,2-propanediol, comprising: cultivating in a medium containing racemic 1,2-propanediol, a microorganism Pseudomonas nitroreducens DS-S-RP8 (Deposit No.: FERM BP-7793) or Alcaligenes sp. DS-S-7G (Deposit No.: FERM BP-3098), which microorganism stereoselectively assimilates (S)-1,2-propanediol in preference to (R)-1,2-propanediol, and then isolating (R)-1,2-propanediol from the culture broth.
